

Title: Senior Credit Analyst (Distressed) (DM0004-017-711)

Location: Chicago

Compensation: Commensurate with experience

Summary: Boutique investment manager seeks senior analyst to join an absolute return credit strategy team. Ideal candidate will be a seasoned credit analyst with demonstrated technical competency and at least five years of relevant work experience in financial analysis in distressed debt.

Responsibilities: Research/evaluate new distressed debt investment ideas for assigned portfolios that meet investment objectives/portfolio requirements. Complete written summaries for Portfolio Manager review and make investment recommendations within assigned segments. Monitor macroeconomic/fundamental trends to generate appropriate investment ideas and contribute to asset allocation decisions. Conduct maintenance research on existing holdings to ensure they continually meet stated investment objectives. Participate in meetings with the CIO and Portfolio Manager to discuss new investment ideas and review fundamental developments on assigned portfolios. Assist Marketing department in client presentations, as directed by the Portfolio Manager.

Experience: 5-10 years experience analyzing distressed debt required. Buy-side experience preferred but not required. In-depth understanding of investment research techniques required. MBA/CFA are preferred.
